Acadia Healthcare Company, L.L.C.

WCP established Acadia Healthcare Company, L.L.C. to acquire, develop and operate a network of behavioral health centers. Acadia provides world-class psychiatric care to its patients in a variety of settings, including behavioral health schools, camps and inpatient psychiatric facilities (“IPFs”). Behavioral health camps and schools provide therapy and education to troubled adolescents. IPFs provide acute psychiatric care to children, adolescents, adults and seniors. Most children and adolescents are treated in less intensive IPF settings known as residential treatment centers while patients with serious mental illness receive 24-hour acute care. People are either referred to a behavioral health center by their physician, psychiatrist or educational consultant, or identify a facility by its general advertisement. Common ailments treated include ADHD, phobias, intermittent explosive disorder, panic disorder, major depressive disorder, bipolar disorder and alcohol/drug abuse. Acadia Healthcare’s mission is to create behavioral health centers where people receive care that enables them to regain hope in a supportive, caring environment.
