Hospitalists Management Group

Hospitalists Management Group is a leading outsourced provider of hospitalist physician programs to acute care facilities and community hospitals throughout the United States. Hospitalists are physicians whose primary professional focus is the general medical care of hospitalized patients. Hospitalists provide many benefits to the constituents of medical care, including patients, payors and care providers. Facilities that have implemented hospitalist programs note improvements in clinical outcomes, increases in patient satisfaction, reductions in average length of stay and greater efficiencies through the application of best practices and quality management.
